Summary

Senior software engineer with 8 years of experience in distributed systems and cloud infrastructure. Led teams of 5-12 engineers at two Fortune 500 companies.

Experience

Stripe, Staff Software Engineer

- Designed and implemented real-time fraud detection pipeline processing 50M+ transactions daily with 99.99% uptime
- Led migration of payment processing infrastructure from monolith to microservices, reducing deployment time by 80%
- Mentored 6 engineers across 2 teams, with 3 promoted to senior level within 18 months

San Francisco, CA
Mar 2021 – present
4 years 1 month

Google, Senior Software Engineer

- Built distributed caching layer for Google Cloud Storage serving 100K+ QPS with sub-millisecond latency
- Reduced infrastructure costs by \$2.4M annually through optimization of resource allocation algorithms
- Contributed to open-source gRPC framework with 40K+ GitHub stars

Mountain View, CA
June 2018 – Feb 2021
2 years 9 months

Amazon Web Services, Software Development Engineer

- Developed auto-scaling algorithms for EC2 fleet management across 3 AWS regions
- Implemented end-to-end monitoring dashboard used by 200+ internal teams

Seattle, WA
July 2016 – May 2018
1 year 11 months

Education

MS Stanford University, Computer Science

- Focus: Distributed Systems and Database Theory

Stanford, CA
Sept 2014 – June 2016

BS UC Berkeley, Electrical Engineering and Computer Science

- GPA: 3.92/4.00, Magna Cum Laude

Berkeley, CA
Aug 2010 – May 2014

Skills

Languages: Python, Go, Java, C++, TypeScript, SQL

Infrastructure: Kubernetes, Docker, Terraform, AWS, GCP

Databases: PostgreSQL, Redis, DynamoDB, BigQuery, Cassandra

Tools: Git, CI/CD, Prometheus, Grafana, Datadog

Certifications

- AWS Solutions Architect Professional (2023)
- Google Cloud Professional Cloud Architect (2022)
- Certified Kubernetes Administrator (2021)
